With Star Wars: The Rise of Skywalker nearby, some fans noticed references to old films in the official trailer and clip of the D23 Expo. From Lando Calrissian flying the Millennium Falcon to Rey wielding a Darth Maul-esque lightsaber, here are few nods to the old Star Wars film in The Rise of Skywalker. Star Wars: Galaxy's Edge | Patrick T. Fallon/Bloomberg via Getty Images Some of the characters from the original trilogy back to 'The Rise of Skywalker' There are a few familiar faces in the trailer for Star Wars: The Rise of Skywalker. Of course, Finn, Poe, and Rey are back in their battle with the Resistance. However, there are a few other characters from the original trio in this final film. That includes Princess Leia, now General Organa, played by Carrie Fisher. Lando Calrissian returns to this Star Wars film and, from what it looks like in a trailer, he's back in the Millennium Falcon. Since fans first met Lando in Empire Strikes Back, the character has sought to regain Han Solo's ship. Now, eventually he will have a chance, most likely by joining the resistance. The Ren Knights return to fight in 'The Rise of Skywalker' Fans have seen a glimpse of Kylo Ren's fierce squad, known as the Ren Knights, in Star Wars: The Force Awakens. Touching Luke's lightsaber sparked Rey's vision. As a result, the Jedi sees Kylo Ren surrounded by other warriors, each wielding a unique weapon. Thanks to Vanity Fair and their look at Star Wars: The Rise of Skywalker, fans learned that the Warriors would re-appear in the final film of the sequel trilogy. The last Jedi director, Rian Johnson, decided to exclude the Knights of Ren from the previous film. I guess I could have used them instead Praetorian guards but then it will feel like wasting them because all the guards had to die. And if Kylo has some kind of connection with them, it will add a complication that might not have helped the scene, directed by Rian Rian said in an interview. The truth is, I just don't see a place for them in the movie. Rey had a red lightsaber in the exclusive look at 'Star Wars: The Rise of Skywalker' As a sith lord is a double-edged knife - or in Rey's case, a double-edged lightsaber. In a Star Wars clip from the D23 Expo, fans see Rey dressed in black, wielding a unique red light sword. There are many theories regarding Rey's shift to the dark side. However, some fans noticed the connection between Rey and the villain from Star Wars: The Phantom Menace, Darth Maul. The evil Rey in Rise of Skywalker sizzle is clearly a vision of some kind. At first, her light sword looked like she was holding two separate blades, but she grabbed them together to form a long light sword like Darth Maul, a Twitter user said. That Star Wars trailer gave me goosebumps. Rey wields a red double-edged light sword and the first thing that appears in his head is Darth Maul. I'm sure it's just part of a vision but it's a great way to introduce more about Palpatine, another Twitter user said. Star Wars: The Rise of Skywalker premiered in the United States on December 20, 2019. Until then, fans can watch Star Wars movies on Netflix and, soon, Disney's streaming platform, called Disney Plus. The Star Wars VFX team told Insider Dark Rey's lights were partly inspired by Darth Maul and Kylo Ren's lightsa turn on. The Star Wars/YouTube Dark Rey light sword opens into a wonderful double-edged light sword. Lucasfilm Obviously you've got Darth Maul connected but there's also a mechanical aspect to it and you don't think she looked great in that moment? Guyett said, comparing Dark Rey's light sword to Darth Maul's double-edged sword from The Phantom Menace. I think the mechanical aspect of that lightsaber gave it that great quality of upping the ante. As it moves out, there are some sort of Jedi-ish or samurai sword-ish type sensations, added Guyett who added fight scenes between two versions of Rey developed after director J.J. Abrams saw Ridley in dark Rey costumes. Image effects monitor Patrick Tubach added that Kylo Ren's light sword also appeared in the conversation as inspiration for the look of Rey's dark blade. On [Episode] 'VII,' it was a really great design choice when we started working on Kylo lightsaber to say, 'What almost looks like a broken light tip?' or 'What looks so angry [that] someone puts it together in anger?' Tubach said. I think it makes sense to take a similar view, Tubach said of what the team did with Rey's dark sword. We asked J.J., 'Does this look like a sword in control? Or is this more than an angry of saber?' He definitely felt like we needed to show 'this is a dark, dark saber.' So that view of the fiery edge and everything we keep some of that same aspect of Kylo saber in this. Insider Inc. receives commissions when you buy through our affiliates.
